

ISO9001:2015 Risk Based Planning

Step 1: Process Analysis Mapping

Introduction

The aim and objective of this workshop is to support you through the process and methodology for implementing a risk based planning process in order to meet the ISO9001:2015 requirements

This workshop is designed with people who have no or only a basic skill knowledge of management systems and will reinforce the knowledge already gained by those with a higher skill knowledge of management systems.

The workshop is a 6 step process spread over six months.

The 1st step is process analysis mapping will cover the following

- Horizontal or Output Process Mapping
- Vertical or Input Process Mapping
- Vertical or Input Process Classifications Codes

Horizontal or Output Process Mapping

Take any process any process be it customer ordering process or purchase ordering process .

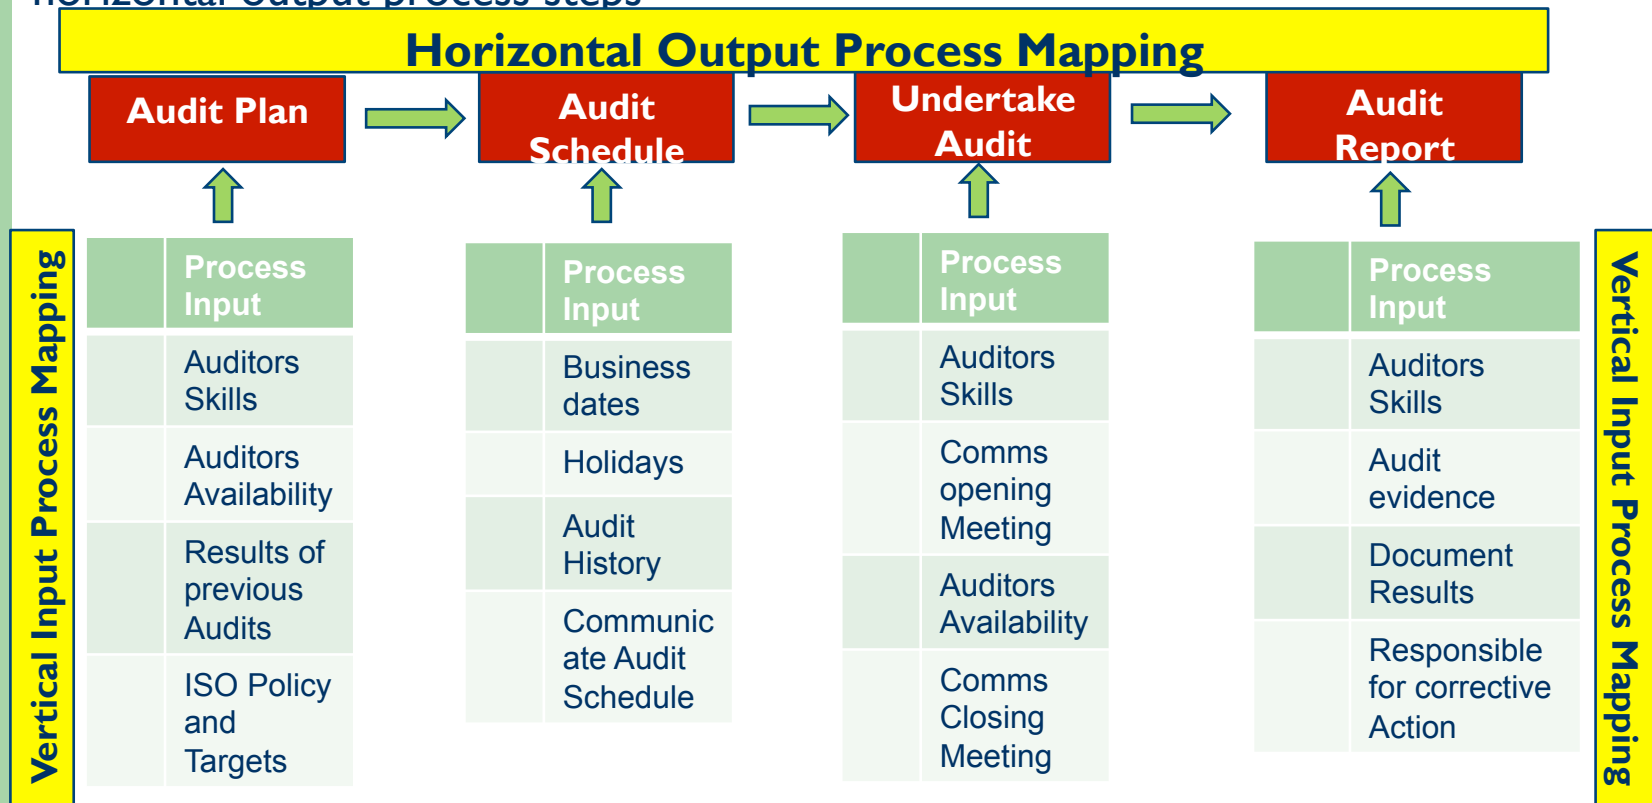

For this exercise we will a auditing process:

Frist list each of the main process steps and place them into the horizontal boxes

Vertical or Input Process Mapping

Next enter each of the input process steps into the vertical boxes against each of the horizontal output process steps

Vertical or Input Process Mapping

Next list the key input process classification codes and symbol

Key Input Process Classifications Codes

▼	Critical
I	Instruction
C	Controllable
D	Data & Information

Vertical or Input Process Mapping

Next enter a classifications code next to a process input like the red reverse delta ▼ is place next to auditor skills due to this is a critical process input into the process out audit plan

Horizontal Output Process Mapping

Vertical Input Process Mapping

KEY	Process Input
▼	Auditors Skills
